We are your business partner successfully branding your identity, improving employee morale and productivity and assisting you with obtaining exciting results with your design, furnishings and tenant improvement budgets.

### Association Headquarters Reception and Employee Lounge, Washington, DC

Multi-function and re-purposing of the unused reception area, the existing space had a large unmanned reception desk and uncomfortable seating. After presenting many ideas we designed and furnished the space to work as both a handsome reception area to greet guests and to be used by the staff when they might like a change in environment, hold meetings and enhance productivity. Forward thinking solution for the unused space by the new President adding quality to the employees' workplace.

Two bariatric guest chairs were incorporated for larger guests and all the seating has comfortable arm rests for ease of working with a laptop or I-pad devices.

New recycled green vinyl wood flooring alternative was installed for softness underfoot, quiet acoustical control, rolling carts, ease of maintenance and no VOC installation with a click in place plank design.

Upholstered stools (not seen) sit under the sofa table allowing staff to sit and work or to bring the stools into the lounge area for additional seating.

A custom fabric panel was designed to accommodate the Flat Screen TV and provide a visible and sound barrier between the offices on the opposite corridor wall.

A contemporary Tibetan wool area carpet was selected and set the stage for the new color scheme.
